FOR IMMEDIATE RELEASE

Nutrition 21, LLC Announces New Consumer Brand Awareness Data for Nitrosigine® and Velositol® and Hires Erika Harvey as West Coast Key Accounts Manager

PURCHASE, NEW YORK – October 25, 2018 – Nutrition 21, LLC (“Nutrition 21”) is pleased to announce the results of a new brand awareness survey recently conducted by American Media Inc. (AMI), publisher of the popular men’s fitness magazines Muscle & Fitness and Flex. For the past year, Nutrition 21 has promoted its cornerstone ingredients, Nitrosigine® and Velositol®, through various print advertisements and digital programs within AMI’s platform to create demand among consumers.

Results from this survey yielded highly favorable data, with Nitrosigine, the company’s nitric oxide boosting ingredient, receiving an 85% brand awareness rating and Velositol, the ingredient that enhances muscle protein synthesis, receiving an 89% awareness rating. Of these two results, Nitrosigine also received an 81% favorable view from consumers with Velositol receiving an 85% favorable view.

“We pride ourselves on developing proprietary ingredients that are efficacious, experiential and safe for the consumer,” said Joe Weiss, President of Nutrition 21. “Educating consumers is a critical part of our marketing strategy, as they need to understand what our ingredients do to inform their purchasing decisions. Our consistent presence in AMI’s publications has helped us establish strong awareness with consumers, which in-turn, has greatly increased brand acceptance of our products. To that end, Nutrition 21 partners have successfully launched over 50 new products containing Nitrosigine and Velositol this year.”

To handle this increased demand for its sports’ nutrition ingredients, Nutrition 21 has also continued to expand its team. This October, executive leadership welcomed Erika Harvey as the Key Accounts Manager, West Coast. Erika brings 16 years of experience selling ingredients in the natural products space, most recently with HORN Nutraceuticals. Erika’s technical expertise includes a thorough understanding of a product’s lifecycle from raw materials to production, as well as assisting customers with new concepts and product development.

“I am thrilled to join the Nutrition 21 team,” said Erika Harvey, Key Accounts Manager, West Coast. “The company has an exciting level of energy and I look forward to working with the team to continue to bring awareness about our high-value, clinically substantiated, ingredients to this ever-changing industry.”

“We are excited to welcome Erika as our Key Accounts Manager, West Coast,” said Todd Spear, Vice President of Sales. “Erika brings a wealth of knowledge and experience in the natural products industry and can provide unique insight to customers when ideating around new products.”

About Nitrosigine®
Nitrosigine, a patented complex of bonded arginine silicate with FDA New Dietary Ingredient (NDI) notification status; affirmed Generally Recognized As Safe (GRAS) at the level of 1,500 mg per day for use in nutritional bars and beverages. Nitrosigine is scientifically engineered to boost nitric oxide levels. The Nitrosigine complex bonds arginine and silicate – unlocking powerful synergistic effects. Nitrosigine is a safe, non-stimulant, effective ingredient that is easy to formulate into new and existing products for

Velositol AMI survey size was 311 participants | Nitrosigine AMI survey size was 271 participants – results provided September 2018.
About Velositol®

Velositol is a patented ingredient designed to enhance the effects of protein and exercise on muscle protein synthesis (MPS). When added to protein, Velositol’s novel complex rapidly stimulates insulin release and increases the muscle cell’s sensitivity to insulin. This helps to safely increase insulin levels and enhance the body’s amino acid uptake, stimulating and boosting MPS. Velositol has attained GRAS (generally regarded as safe) status for 2 grams, to be used in protein drinks (including ready-to-drink and powder), meal replacement bars, energy and protein bars.
